The University of Tokyo’s College of Arts and Sciences and Graduate School of Arts and Sciences together form a large organization that includes about 6,500 junior division (first- and second-year) undergraduate students, 400 senior division (third- and fourth-year) undergraduate students, and 1,400 graduate students in master’s and doctoral programs. The history, structure, systems, facilities, and other features of our College and Graduate School are summarized in this Prospectus.

In order better to fulfill our role within today’s rapidly globalizing society, the University of Tokyo is now undergoing unprecedented transformations, including comprehensive educational reforms. As these changes move ahead, the organizational charts, data, and other matters described in this Prospectus will inevitably evolve as well. I hope that this Prospectus will serve as a useful overview of today’s College of Arts and Sciences and Graduate School of Arts and Sciences during this period of transition.

Dean of the Graduate School of Arts and Sciences and the College of Arts and Sciences
Dr. Yojiro Ishii

Organization

The Komaba Campus of the University of Tokyo is home to the College of Arts and Sciences, the Graduate School of Arts and Sciences, the Graduate School of Mathematical Sciences, and a number of advanced research facilities and campus services. What is now the College of Arts and Sciences was founded on May 31, 1949, when the new University of Tokyo started under the present system. Unlike general education sections in other national universities throughout Japan, the College was established as an autonomous institution from the start. The guiding spirits behind this special independence were Tadao Yanaihara, the first Dean of the College, and his colleagues, who believed in an integrated approach to learning aimed at the education of “unbiased individuals with all-round knowledge” and at “fostering the spirit of a life-long quest for truth.” When most universities in Japan abolished their general education sections in the 1990s, the College of Arts and Sciences took a different course; it carried out a thorough reform of its curriculum and has maintained until today its tradition of providing general, “liberal arts” education to all those entering the university in their first two years (Junior Division). In October 2012, the Junior Division welcomed international students from different parts of the world into its newly established PEAK Program (Programs in English at Komaba), in which students may complete their undergraduate degrees entirely in English.

The Senior Division of the College of Arts and Sciences provides specialized education to students in their third and fourth years. It offers a unique, interdisciplinary, international and advanced curriculum that seeks to realize in a more developed form the ideal of the Junior Division, namely, the search for new knowledge from an international and global point of view that transcends the traditional barriers between disciplines. The Senior Division began with the establishment of the Department of Liberal Arts in 1951, which was followed by that of the Department of Pure and Applied Sciences in 1962, and has constantly been developing and reforming itself in response to the needs of modern society and the changing times. A thorough reform was carried out again in 2011, resulting in the reorganization of the Senior Division into three new departments. The new Department of Humanities and Social Sciences consists of three sections: Interdisciplinary Cultural Studies, Area Studies, and Social and International Relations. The new Department of Interdisciplinary Sciences, with four divisions in Science and Technology Studies, Geography and Design Sciences, Informatics, and Earth System and Energy Sciences, as well as a sub-program in Evolutionary Sciences, aims at the integration of the arts and the natural sciences. The new Department of Integrated Sciences comprises four divisions in Mathematical Natural Sciences, Matter and Materials Science, Integrated Life Sciences, and Cognitive and Behavioral Sciences, as well as a sub-program in Sports Sciences.

The College instituted its own Graduate Division of International and Interdisciplinary Studies in 1983. This consisted of four programs: Comparative Literature and Culture, Area
Studies, International Relations, and Social Relations. Three more programs, Cultural Anthropology, Multi-Disciplinary Sciences, and Culture and Representation, were later added. The next phase of restructuring began with the creation of Language and Information Sciences (1993). In 1994-95, Multi-Disciplinary Sciences was expanded to embrace Life Sciences, Basic Science, and General Systems Studies. In 1996 the existing six programs in Humanities and Social Sciences were reorganized into three sections of Interdisciplinary Cultural Studies, Area Studies, and Advanced Social and International Studies, thus completing the restructuring of the College’s graduate division (renamed the Graduate School of Arts and Sciences in 1996). Furthermore, the Graduate School of Mathematical Sciences was established on the Komaba Campus as an independent institution in 1992. A large number of the staff of this graduate school also teach in the Junior Division of the College of Arts and Sciences.

The Graduate School of Arts and Sciences has, for many years, been producing graduates with the vision and broad base of advanced learning necessary for identifying and meeting the multifaceted challenges of the modern world. This tradition led, in April 2004, to the establishment of the Graduate Program on Human Security (HSP) with the cooperation of its five departments. In April 2012, with the participation of its four arts departments, the Graduate School launched a new Graduate Program on Global Humanities (GHP), which aimed to tackle the problems of the modern world through an approach that would transcend the traditional boundaries between disciplines and regions. In October 2012, the Graduate Program on Global Society (GSP (liberal arts)) and the Graduate Program on Environmental Sciences (GPES (integrated liberal arts-sciences)), also began accepting students. Both of these programs allowed students to earn their degrees by following courses taught only in English. Other programs that have been inaugurated at the Graduate School of Arts and Sciences since 2005 include the Science Interpreter Training Program, aimed at the facilitation of communication between the public and the science and technology community; the European Studies Program and the Japan-Germany Inter-Graduate School Program, both aimed at the implementation of interdisciplinary education and research on modern Europe; and the International Philosophical Education Program on Co-Existence, which seeks to open up new frontiers in the humanities.

A number of special centers have been established to support teaching and research at the College and the Graduate School. One of these recent developments is the Institute for Advanced Global Studies (IAGS), which was established in April 2010, incorporating the existing Center for Pacific and American Studies (CPAS) and Center for German and European Studies (DESK), as well as the three newly founded centers for African Studies, Sustainable Peace, and Sustainable Development. The IAGS was joined a year later in April 2011 by two more new centers, one dedicated to Asian Studies and the other to Middle Eastern Studies (UTCMES). The Komaba Organization for Educational Development
(KOMED), established in 2005 to further improve undergraduate teaching in the College of Arts and Sciences, merged with the Center for Structuring Life Sciences to form the Komaba Organization for Educational Excellence (KOMEX) in April 2010.

The history of the Komaba Campus has therefore been a tale of growth. When it started in 1949, the Junior Division had two sections for human sciences and two sections for natural sciences. Currently there are three sections for each branch, and the total enrollment in the Junior Division is 6,590, double what it was in 1949. There are 423 students in the Senior Division, and 1,339 Master’s and Doctoral students in the Graduate School of Arts and Sciences. The number of permanent faculty members, including professors, associate professors, and full-time lecturers, was 275 as of May 1, 2013, which is about three and a half times as many as in the year of the establishment of the College.

Campus

The Komaba Campus has a long and fascinating history. The campus and its environs were formerly called the Komaba Meadows, the whole area having been set aside as hunting grounds for the ruling Tokugawa family from the time of the eighth Shogun Yoshimune (early 18th century). The estate was said to include a medicinal herb garden as well. The Meadows covered 50 hectares of land, extending over what is now Komaba Park. There is still a small spring on campus, reminding us of how the ancient Musashino plains must have looked.

In 1878, one decade after the Meiji Restoration, the Komaba School of Agriculture was established at the northwestern corner of the grounds, where the College now stands. This School was eventually incorporated into the Tokyo Imperial University, the predecessor of the University of Tokyo, as the Faculty of Agriculture in 1890. Some of the buildings of the school were destroyed by fire during World War II, and the others were all demolished later.

In 1935 the Faculty of Agriculture was transferred to grounds adjacent to the Hongo Campus, and its place was assumed by the Dai-ichi Kōtō Gakkō, the preeminent three-year preparatory school for admission into Imperial Universities. At about the same time, new buildings were constructed at Komaba, following the architectural styles used for the Hongo Campus. When the Dai-ichi Kōtō Gakkō was incorporated into the postwar University of Tokyo, the Komaba Campus finally became the seat of the University’s College of General Education, which was later renamed the College of Arts and Sciences. The College was thus reborn from what was left of the war-damaged buildings of the Dai-ichi Kōtō Gakkō and some temporary structures built after World War II. In addition to renovating these buildings, the College also made great efforts to restore and expand the campus gardens. This is one of the reasons why the Komaba Campus boasts so many old trees, including some very rare ones. Many of the famous cherry trees on campus, including those adorning the edges of the Rugby Field, were planted after the war.

Beginning in the 1980s, major improvements were made to the research facilities with
the construction of a number of new buildings mainly in the western half of campus. Since 2000, development has concentrated at the eastern end to improve the classroom facilities, as well as facilities for extracurricular activities. The opening in 2006 of the Komaba Communication Plaza with its facilities for theatrical, musical and other extracurricular activities led to a major change in the image of the campus. The year 2011 saw the completion of the Komaba Center for Educational Excellence, which houses studio-type classrooms with special ICT equipment designed to facilitate active learning.

1949.5 College of General Education (Kyōyō Gakubu) established by amalgamating Dai-ichi Kōtō Gakkō and Tokyo Kōtō Gakkō, to form part of the University of Tokyo (formerly Tokyo Imperial University) under the new National University Establishment Law.

1949.6 First matriculation of students at the College of General Education (1,804 entered including 9 women).

1950.3 Dai-ichi Kōtō Gakkō abolished.

1951.3 Tokyo Kōtō Gakkō abolished.

1951.4 Department of Liberal Arts (Kyōyō Gakka) established in the College.

1952.6 Students’ Clinic opened.

1953.3 Graduation of the first class of students of the University under the new system, including 51 Bachelors of Liberal Arts, from the College.

1953.4 Student Counseling Center opened.

1962.4 Department of Pure and Applied Sciences (Kiso Kagakuka) established in the Senior Division of the College.

1964.4 Komaba Department of the Administration Bureau created (General Affairs, Academic Affairs, and Student Affairs Divisions).

1967.1 Students’ Clinic reorganized as the Komaba Branch of the newly established Health Service Center of the University.

1967.6 The Center for American Studies established.

1975.4 Library Division established.

1977.4 Reorganization of the Department of Liberal Arts.

1979.7 30th anniversary of the establishment of the College celebrated. *College of General Education: The First Thirty Years* published.

1981.4 Reorganization of the Department of Pure and Applied Sciences: Department of Natural and Artificial Systems established. Finance Division established.

1983.4 Graduate Division of International and Interdisciplinary Studies (Sōgō Bunka Kenkyūka) established in the College. College of General Education renamed College of Arts and Sciences.

1987.4 Komaba Branch of the Educational Computer Center opened.

1989.6 40th anniversary of the establishment of the College celebrated. *College of Arts and Sciences: The First Forty Years* published.

1989.10 Academic Guidance Center opened.

1992.4 Graduate School of Mathematical Sciences established.

1993.4 Graduate Department of Language and Information Sciences established. New curriculum for the Junior Division of the College implemented.

1993.6 Mitaka International Hall of Residence opened (Komaba Student Dormitory abolished).

1994.4 Graduate Department of Multi-Disciplinary Sciences-Life Sciences established. Reorganization of Graduate Departments of Multi-Disciplinary Sciences
Science and Multi-Disciplinary Sciences-General Systems Studies begun.

1995.4 Graduate Departments of Multi-Disciplinary Sciences-Basic Science and Multi-Disciplinary Sciences-General Systems Studies restructured.

1996.2 Graduate Division of International and Interdisciplinary Studies renamed Graduate School of Arts and Sciences.

1996.4 Graduate Programs of Comparative Literature and Culture, Cultural Anthropology, and Culture and Representation integrated and restructured as Interdisciplinary Cultural Studies. Graduate Programs of Social Relations and International Relations integrated and restructured as Advanced Social and International Studies. Graduate Program of Area Studies restructured into a department. Restructuring of the Graduate School of Arts and Sciences completed.

Undergraduate (Senior) Department of Liberal Arts reorganized into Department of Interdisciplinary Cultural Studies, Department of Area Studies, and Department of Social and International Relations. Department of Pure and Applied Sciences and Department of Natural and Artificial Systems reorganized into Department of Basic Science, Department of General Systems Studies, and Department of Life and Cognitive Sciences.

1999.4 Komaba Branch of the Educational Computer Center reorganized into the Information Technology Center.

2000.4 Center for American Studies reorganized into the Center for Pacific and American Studies.

2000.11 College of Arts and Sciences 50th Anniversary Symposium: “Exploring the Role of the University in the 21st Century.”

2002.10 Opening of the new Komaba Library.

2004.4 The University of Tokyo reorganized as an incorporated national university.

2005.4 Komaba Organization for Educational Development established.

2006.4 New curriculum for the Junior Division of the College implemented. The North Building of Komaba Communication Plaza opened.

2006.6 Administration offices restructured.

2006.10 The whole complex of Komaba Communication Plaza opened.

2009.3-10 Commemoration of the 60th anniversary of the establishment of the College of Arts and Sciences.

2010.4 Komaba Organization for Educational Excellence and Institute for Advanced Global Studies established.

2011.4 Senior Division of the College of Arts and Sciences restructured into Department of Humanities and Social Sciences, Department of Interdisciplinary Sciences, and Department of Integrated Sciences.

2011.5 21 Komaba Center for Educational Excellence opened.

2012.10 Undergraduate and graduate degree programs offered in English – Programs in English at Komaba (PEAK), Graduate Program on Environmental Sciences (GPES), and Graduate Program on Global Society (GSP) – established.
Education at Komaba is provided at three different levels: the Junior Division, the Senior Division, and the Graduate School.

### Junior Division

The College of Arts and Sciences consists of the Junior Division and the Senior Division. All undergraduate students of the University of Tokyo undertake their first two years of study (“Junior Division”) at the College of Arts and Sciences on the Komaba Campus. All students belong to one of six streams: Humanities and Social Sciences I through III or Natural Sciences I through III. The curriculum for each of these streams is directed mainly toward specialization in Senior Division undergraduate courses in the following Faculties.

<table>
<thead>
<tr>
<th>Junior Division</th>
<th>Senior Division</th>
</tr>
</thead>
<tbody>
<tr>
<td>Humanities and Social Sciences I</td>
<td>Faculties of Law, and Arts and Sciences</td>
</tr>
<tr>
<td>Humanities and Social Sciences II</td>

<tr>
<td>Natural Sciences II</td>
<td>Faculties of Agriculture, Science, Pharmaceutical Sciences, Medicine, Engineering, and Arts and Sciences</td>
</tr>
<tr>
<td>Natural Sciences III</td>
<td>Faculties of Medicine, and Arts and Sciences</td>
</tr>
</tbody>
</table>

At the end of the third semester, majors are decided according to each student’s preferences and academic performance and departmental capacity. The great majority of students move on to one of the above Faculties, which are located largely on the Hongo Campus. The others pursue Senior Division courses on the Komaba Campus. The College’s Senior Division, Faculty of Arts and Sciences, accepts students from any of the six streams in the Junior Division. In 2008, a new admission system started in which there is greater flexibility for students in choosing their departments for senior study.

The curriculum in the Junior Division consists of Foundation Courses, Integrated Courses, and Thematic Courses. During their initial three semesters in the Junior Division, students study subjects included in these courses. In their fourth semester, students combine Junior Division courses and specialized courses, with appropriate shifts in emphasis prescribed by each Faculty or Department in the Senior Division.

In April, 2008, ALESS (Active Learning of English for Science Students) started as a required course for science students in the core English program. The aim of the course is to develop the skills necessary to write a short scientific paper and to make an academic presentation in English. Classes have a maximum of 15 students and are taught in English by teachers who are either native speakers of English or have native-level English language skills. For students studying humanities and social sciences, ALESA (Active Learning of English for Students of the Arts) started in April, 2013.
The Senior Division at Komaba, the Faculty of Arts and Sciences, was reorganized into three departments in the academic year 2011. The primary goal of the Senior Division is to foster a broad understanding of the complex issues facing human society in the 21st century. It has been organized based on the assumption that in order to respond effectively to these diverse contemporary problems, students need to be able to discern and transcend existing systems of categorization. Constant attention to curriculum reform within the Senior Division therefore embodies an ongoing search for effective ways to combine a solid academic grounding with cutting-edge specialized education. As a small and highly selective educational unit, the Division is also able to make productive use of students’ input and creativity. From the tradition established at the time of its original establishment as the Department of Liberal Arts and the Department of Pure and Applied Sciences, Komaba’s Senior Division continues to produce widely respected graduates ready to contribute their creative intelligence and problem-solving skills to society. While a significant number choose to pursue graduate studies, others pursue a career in civil service, in the corporate world, in educational or research institutions.

The Senior Division consists of the following departments.

### Department of Humanities and Social Sciences

- **Interdisciplinary Cultural Studies**
  - Cultural Anthropology; Culture and Representation; Comparative Literature and Arts;
  - Contemporary Thought and Philosophy; Interdisciplinary Japanese Cultural Studies;
  - Interdisciplinary Language Sciences; Studies on Language, Text and Culture
- **Area Studies**
  - British Studies; French Studies; German Studies; Russian and East European Studies;
  - Italian / Mediterranean Studies; North American Studies; Latin American Studies;
  - Asian and Japanese Studies; Korean Studies
- **Social and International Relations**
  - Interdisciplinary Social Sciences; International Relations
  - Japan in East Asia

### Department of Interdisciplinary Sciences

- **Science and Technology Studies; Geography and Design Sciences; Informatics; Earth System and Energy Sciences; Evolutionary Sciences; Environmental Sciences**
- Environmental Sciences

### Department of Integrated Sciences

- **Mathematical Natural Sciences; Matter and Materials Science; Integrated Life Sciences; Cognitive and Behavioral Sciences; Sports Sciences**
- The international programs offered in English
Short-Term Student Exchange Program (AIKOM)

The AIKOM (Abroad In Komaba) Program is a one-year undergraduate exchange program between the University of Tokyo and 31 partner universities in 20 countries. It is operated under a formal short-term exchange agreement, which stipulates mutual tuition waiver (whereby participating students pay full tuition to their home university), and credit transfer (whereby credits earned during the study year abroad and which fulfill stated requirements are recognized by the students’ home universities). Applications are solicited from students in the Senior Division of the College (except for a few Departments) and students of the partner universities. The College now sends and receives more than 25 students each year.

A special curriculum is provided for AIKOM students at Komaba, which includes courses offered in English, such as Dynamics of Japanese Cultural History, Aspects of Japanese Society, Specialized Courses on Japanese Studies, Japanese Language, and Directed Independent Study. All of these courses, except for the Japanese Language Courses and Directed Independent Study, are open to regular students in the Senior Division of the College. AIKOM students who have fulfilled requirements for the special curriculum are also free to take regular courses in the College’s Senior Division according to their academic interests and Japanese language proficiency.

The partner universities are as follows:

Asia: Peking University, Nanjing University, and Fudan University (China), Gadjah Mada University (Indonesia), Seoul National University (South Korea), University of Malaya (Malaysia), University of the Philippines (Philippines), Vietnam National University, Hanoi (Vietnam), National University of Singapore (Singapore)

Oceania: Monash University, University of Melbourne, and University of Sydney (Australia), University of Auckland and University of Otago (New Zealand)

North and South America: University of Michigan, Swarthmore College, University of Washington, Johns Hopkins University, and Princeton University (USA), University of Toronto (Canada), Pontifical Catholic University of Chile (Chile)

Europe: Universités Associées de Grenoble, Universite de Strasbourg, and Institut d’Etudes Politiques de Paris (France), Ludwig-Maximilians-University of Munich (Germany), University of Warwick (UK), University of Geneva (Switzerland), University of Roma “La Sapienza” (Italy), Uppsala University (Sweden), and Trinity College Dublin, University of Dublin (Ireland)

Africa: Cairo University (Egypt)
The Graduate School of Arts and Sciences was established with the primary objective of providing opportunities for students to deepen the knowledge acquired during their undergraduate years. Reflecting its interdisciplinary and international spirit, the Graduate School is committed to train not only scholars in specialized academic fields, but also professionals whose expertise will enable them to make great social contributions in a variety of practical fields.

In the list of departments below, those in parentheses indicate shared inter-departmental specializations.

Graduate Program on Human Security (HSP)  
http://hsp.c.u-tokyo.ac.jp/index.html

Human Security is a new concept focusing on the development of a more humane global society for the 21st century. In order to nurture "human assets" who will make innovative contributions in this area, the Graduate Program on Human Security (HSP) was launched in April 2004. The HSP offers Master’s and Doctoral courses based on close coordination among the five departments in the Graduate School of Arts and Sciences. Each year around 16 students are accepted into the Master’s course and 4 students into the Doctoral course. These students receive M.A. and Ph.D. degrees in Human Security Studies when they complete the program.

The HSP holds a variety of seminars and symposiums throughout the year with practitioners as well as researchers in the field of human security.

European Studies Program (ESP)  
http://www.desk.c.u-tokyo.ac.jp/j/esp.html

The ESP is a Master’s-level program whose aim is to cultivate specialists in European Studies. In the program, students acquire the basic knowledge and methodologies of European studies through its core courses, including Methodologies of European Studies, Supervised Readings and the European Fall Academy (EFA), which is held for 2 weeks in Germany. ESP students obtain an MA in European Studies by submitting a thesis on a relevant topic and successfully completing the curriculum. After graduation, the students are expected to be instrumental in acting as a bridge between Europe and Japan.
Global Humanities Program (GHP)

We are living in a complicated age in which the progress of globalization is leading to growing global unification. At the same time this process of globalization also reveals the pluralized nature of global society, characterized by differences in ethnicity, gender, social class and so on. In times like these the ability to understand and to communicate with others in an interactive way while positioning ourselves against the global background is of paramount importance. The goal of the Graduate Program on Global Humanities is to foster this kind of ability by educating people who can contribute to the realization of a pluralist global society.

Japanese-German International Joint Graduate School (IGK)

The IGK is a program for the promotion of joint research and education conducted by the University of Tokyo and the University of Halle in Germany. This program was started in 2007 with the support of the Japan Society for the Promotion of Science and the German Research Foundation. Every year there are exchanges of graduate students and professors for joint research and education. Furthermore we hold joint classes during the semester and semi-annual joint seminars in Halle and Komaba. In addition, we conduct an international joint research project concerning the changing modes of civil society from a German-Japanese comparative perspective.
PEAK (Programs in English at Komaba)

http://peak.c.u-tokyo.ac.jp/

The University of Tokyo’s Programs in English at Komaba (PEAK) admits a select number of students who exhibit the potential for intellectual growth and leadership, and can contribute to the diversification of the campus with their cultural and educational backgrounds, in line with the University’s initiative to establish a global campus and nurture global leaders. Unlike other undergraduate courses, PEAK admits students through a combination of document screening and on-site interviews and starts its curriculum in the fall. In October of 2012, 27 students from more than ten countries joined PEAK.

PEAK consists of the “International Program on Japan in East Asia” and the “International Program on Environmental Sciences.” The aim of these undergraduate degree programs is to share the rich intellectual and educational resources of the University with the wider global community. The classes will be taught in English, but students will also have an opportunity to learn the Japanese language during their studies.

Students in the “Japan in East Asia” program will gain an international and interdisciplinary understanding of East Asia’s past, present and future with a particular focus on Japan. The program encourages students to develop skills and knowledge in order to foster constructive dialogue within East Asia and around the world. Students are expected to actively engage with the educational and cultural environment at the University.

Students accepted to the “Environmental Sciences” program will study this complex multidisciplinary subject from many different viewpoints including environmental and economic policy, ethics and jurisprudence. They will also learn about biodiversity conservation, geochemical cycling, geophysics and the latest environmental technologies from an advanced science and engineering perspective. The primary aim of the program is to nurture well-rounded environmental specialists who can design and implement integrated approaches to current and future environmental issues.

Graduate Program on Environmental Sciences (GPES)

http://gpes.c.u-tokyo.ac.jp/introduction/index-jp.html

The organization for Programs on Environmental Sciences was established in May 2012 in order to conduct the Program on Environmental Sciences, which consists of an undergraduate course and advanced level degree program (offered at both Masters and Ph.D. level). All the lectures in the graduate program are delivered entirely in English by about 60 professors and associate professors of this organization, who are from a variety of departments in the university. The goal of this program is to provide students with a broad-based, inter- and multidisciplinary understanding of the complex topic of environmental sciences. To achieve this, the organization is designed to cover the following six basic areas in environmental sciences: (1) Environmental Principles, (2) Management and Policy, (3) Measurement and Evaluation, (4) Materials, Systems and Dynamics, (5) Energy and Resources, (6) Health and Security. Students develop a unique set of skills which will enable them to analyze, critique, propose and define environmental policy from economic, cultural and political viewpoints. Professional training in GPES is based on a platform of basic science and technology, which covers aspects from basic physics and chemistry to environmental processes such as ecological systems and methods for measuring global material circulation. Students choose their area of specialization from a wide range of relevant fields including natural and agricultural sciences, industrial technologies, and social sciences including economics, politics and other related disciplines.
The Graduate School of Arts and Sciences launched a new Graduate Program on Global Society (GSP) in the fall of 2012. Focusing on the theme of human existence in the age of globalization, this program seeks to provide the type of agenda-shaping and problem-solving leadership needed in a multipolar world. Emerging trends in globalization require us to assume new perspectives and reconsider the political, social, ecological, cultural and ethical dimensions of the changing human condition. To that end, the GSP offers highly relevant and in-depth approaches to the challenges of a globalized civil society. The program also enables the development of innovative forms of global governance that seek to better address the increasingly complex global issues we face today. Students from all over the world are welcome to participate in the GSP program, conducted in English, and work toward their M.A. or Ph.D. degrees in Global Studies.
TODAI Liberal Arts Program (LAP)

It is the mission of LAP to pursue the possibility of a new kind of liberal arts education in Asia by transmitting our university’s lectures throughout Asia and by encouraging academic exchanges between Japanese and Asian universities. So far we have delivered the new kind of liberal arts education, which combines the humanities and sciences, primarily to Chinese universities. Nanjing University is our main partner and for 7 years we have sent about 10 professors every year in March to conduct intensive seminars and lectures. Since 2010, we have begun student exchange programs twice per year in Mar. and Nov., having both Japanese and Chinese students take the same lectures and collaborate on the subject dealt in with lectures. In 2012, we started a new academic exchange program with Melbourne University by sending 2 professors and giving lectures there. From 2013 to 2017, by a donation from ZENSHO HOLDINGS CO., Ltd., we have been cooperating with Nanjing University on the Summer Chinese Language Course. 20 students participate in every year. During this period, the student exchange programs mentioned above are also supported by the same donation.

East Asia Liberal Arts Initiative (EALAI)

Originally launched in 2005, the East Asia Liberal Arts Initiative (EALAI) conducts educational and academic exchanges with institutions of higher education both within East Asia and elsewhere, with the aim of establishing new models of liberal arts education suited to the cultural and social needs of the East Asian region. Since its establishment, EALAI has been playing a central role in the organisation of the annual BESETOHA Forum, a forum for sharing the latest academic and educational achievements between Peking University, Seoul National University, The University of Tokyo, and the Vietnam National University, Hanoi. New innovative educational programs implemented by EALAI include the joint e-lecture series on Asian cultures and economies with SNU and VNU-Hanoi, which began in 2008, and the Zensho-UT Japan Studies Program in VNU-Hanoi, launched in 2012.
The AIKOM (Abroad in Komaba) Program is a one-year undergraduate exchange program between the College of Arts and Sciences and 31 partner universities in 20 countries. It is operated under a formal short-term exchange agreement that stipulates mutual tuition waivers (whereby participating students pay full tuition to their home institutions), and credit transfer (whereby credits earned during the study year abroad are recognized by the students’ home institutions). Applications are solicited from students in the Senior Division of the College (except for a few Departments) and students of the partner institutions. The College now sends and receives more than 25 students each year.

A special curriculum is provided for incoming exchange students at Komaba, which includes courses offered in English on Japanese culture and society and Japanese Language courses.
Science Interpreter Training Program

This is a university-wide minor program for selected graduate students with the aim of nurturing leading figures who can bridge science/technology and society. The curriculum of at least one year and a half offers programs for students to acquire varied and critical ways of thinking and to master writing, presenting and interviewing skills, in cooperation with distinguished instructors both on- and off-campus. It focuses not only on "how to communicate," but also on "what to communicate." The graduates of this program are working actively in a wide range of fields, including research and development, science and technology policy, education, and journalism. In 2012, we have extended the graduate program to third and fourth-year undergraduate students as well as some seminars for first and second-year students.
