

December 2018

Announcement to Environmental Sciences 3rd year April-entry students:
guidance session for the Graduation Project

A guidance session for the Graduation Project will be held as described below. The Graduation Project is one of most important requirements in the ES senior division program. All ES-course 3rd April-entry year students are strongly encouraged to attend the session, where important information about the project and potential laboratories will be explained in detail.

Date: January 5, 2019, Saturday

Time: 10:00 to 10:30

Room: KIBER Room 314

During the weeks following this session, professors offering projects welcome you to visit their laboratories. Please be advised that visiting a professor and his/her laboratory should be arranged well in advance by making an appointment. The contact information of each professor will be provided at the above session.

While this session is particularly targeted at 3rd year April-entry PEAK ES students, all PEAK 2nd and 3rd year students are also welcome to attend.

Note that directly following this session, a graduation thesis presentation event for the 4th year students graduating in March, 2019 will be held in the same room. Students attending the guidance session are strongly recommended to stay for this event, too.

ES Program Director
