United Nations University Institute for the Advanced Study of Sustainability (UNU-IAS) Spring 2025

> Location: 6F Lecture Room Time: Fridays 11:20-13:00 (100 min.) with some exceptions

Lecturer: Maiko Nishi (nishi@unu.edu) and Suneetha M Subramanian (subramanians@unu.edu) - TBD¹ Office Hours: by appointment

Course Description

Recent global assessments of life on Earth show pervasive human-driven decline in nature. Biodiversity loss ranks as one of the three most potentially severe risks for the next decade (World Economic Forum 2022). Understanding the dynamics in human-nature interactions across multiple scales and levels is crucial for designing and implementing the interventions to enhance biodiversity conservation and ensure sustainability. Socio-ecological production landscapes and seascapes (SEPLS) – defined as dynamic mosaics of habitats and land and sea uses where harmonious human-nature interactions maintain both biodiversity and human wellbeing – manifest a sustainable model of management practices that helps us to achieve the 2050 Vision for Biodiversity: living in harmony with nature. This course aims to deepen the understanding of SEPLS and explore various approaches to the studies of SEPLS. It will introduce key concepts, theories, methodologies that are useful to understand and undertake research on productive landscapes and seascapes hinging on the concept of SEPLS.

Course Objectives and Leaning Goals

This course will provide students with knowledge concerning key features of SEPLS as well as challenges and opportunities in managing SEPLS. It will also demonstrate various methodological approaches to the studies of SEPLS. By the end of the semester, students will be able to:

- Be familiarized with science-policy-practice processes concerning biodiversity, nature's contributions to people, and sustainability;
- Understand key concepts, approaches and methods for research on SEPLS, including landscape approaches, multiple values to nature, social-ecological resilience, mapping and modeling, and scenario development and analyses;
- Gain hands-on training experiences where students demonstrate a few selected methodological tools; and
- Conceptualize, design and critique empirical research on SEPLS.

¹ The course instructor may change in due course.

Requirements and evaluation policy

The course requirements include class participation, mid-term and final group presentations, a final group report, and a final individual paper. The grading policy is as follows:

- Class participation: 20%
- Final group presentation (20%) and report (30%): 50%
- Individual paper: 30%

Class Participation:

Students are expected to do the assigned readings and come to sessions prepared for active participation in class discussions. The course requires students to show up to class on time and actively participate in all the classes.

Group Presentations and Report:

Students are required to design and conduct group work on one topic in which group members are interested. Outputs from each group will include a mid-term group presentation, a final group presentation, and a final report (approximately 3,000 words excluding references). A final presentation, as well as a final report, is expected to cover the problem statement (background), objectives and research questions (including hypotheses if appropriate), methodologies and methods, study materials and area/sites, results, discussion, conclusion, and references. Each group will make a mid-term presentation, which will not be graded, to report the progress of its work and receive feedback from the instructor (and possibly guest critique(s)) for further work and any improvements.

Individual Paper:

Students are required to produce one individual term paper as a research proposal on the topic related to the course contents, which is of individual interest (approximately 1,000-2,000 words excluding references). The individual paper follows the general format of a research proposal, covering the problem statement (background), objectives and research questions (including hypotheses if appropriate), methodologies and methods, study materials and area/sites, expected outputs, and references.

Course Readings

Each class will have a set of required readings that should be completed prior to the class. The average reading load per class is 40-80 pages (although it depends on the subject of each class). The lecturer reserves the right to update the reading list throughout the course and will alert students to the changes in class.

Invited Speakers/Lecturers Bio

Maiko Nishi, Ph.D. (Lectures 1, 2, 12, and 13)

Research Fellow, UNU-IAS

Dr. Maiko Nishi is a Research Fellow of UNU-IAS, engaging in research and capacity development for the International Partnership for the Satoyama Initiative (IPSI). Her area of research interest includes social-ecological system governance, local and regional planning and agricultural land policy. In particular, her interest lies in multi-level governance, land tenure and use, and subjectivities of institutional actors in governing natural resources. She began her career as a consultant in urban planning and experienced projects related to participatory planning, rural water supply and regional development. She currently serves as a Lead Author for the IPBES thematic assessment on transformative change.

Keita Furukawa, Ph.D. (Lecture 3)

Dr Keita Furukawa, President of the Association for Shore Environment Creation (NPO), Affiliated Research Fellow, the Ocean Policy Research Institute of the Sasakawa Peace Foundation, Japan, and Technical session chair of the Partnerships in Environmental Management for the Seas of East Asia (PEMSEA). He has more than 30 years of experience with marine and coastal environmental research and coastal ecosystem restoration project implementation with integrated coastal management (ICM).

Suneetha M Subramanian, Ph.D. (Lecture 4)

Research Fellow, UNU-IAS

Dr. Suneetha M. Subramanian is currently a Research fellow with the United Nations University Institute for the Advanced Study of Sustainability. She has more than 15 years of experience in international and sub-national research and capacity building activities relating to biodiversity and human well-being focusing on equity, traditional knowledge, linking policy goals to local priorities and community well-being, socio-ecological resilience. She has been involved in various assessments of the IPBES (Regional, Global and currently Values Assessment) as Lead/ Co-ordinating Lead author and is on the Editorial board of the Sustainability Science Journal and the Journal of Ecosystems and People.

Himangana Gupta, Ph.D. (Lecture 5)

Research Fellow and Academic Associate, UNU-IAS

Dr. Himangana Gupta is an expert in climate change and biodiversity policy. She has worked on climate adaptation, forestry, carbon markets, sustainability, and gender. Currently, she is Research Fellow and Academic Associate at UNU-IAS. Prior to this, she was Manager, World Resources Institute, India. From 2019-2021, she was a JSPS-UNU Postdoctoral Fellow. She also worked as Programme Officer, Ministry of Environment, Forest and Climate Change, India from 2016-2019. She has seven co-edited books to her credit and more than 30 research publications. Currently, she is also serving as Lead Author for the IPBES Nexus Assessment.

Rajarshi Dasgupta, Ph.D. (Lecture 7)

Senior policy researcher, Institute for Global Environmental Strategies (IGES)

Dr Rajarshi Dasgupta is an Assistant Professor at the School of Public Policy, Indian Institute of Technology, Delhi. He is also a fellow of the Institute for Global Environmental Strategies (IGES). His research interests are environmental scenario planning, spatial quantification of ecosystem services and community-based conservation. He was a Lead Author (LA) for the Intergovernmental Science-Policy Platform for Biodiversity and Ecosystem Services (IPBES) Asia-Pacific Regional Assessment Report and the IPBES assessment on Sustainable Use of Wild Species (2018-2022). Dr Dasgupta authored/co-authored more than 60 peer-reviewed papers in reputed international journals on the topic related to the mapping and monitoring of ecosystem services and natural resource conservation. He also worked as a chapter scientist for IPCC's sixth assessment report.

Yoji Natori, Ph.D. (Lecture 8)

Associate Professor, Global Studies, Faculty of International Liberal Arts, Akita International University

Expertise in landscape ecology and conservation. Joined AIU in 2019 after 16 years with NGOs. At AIU, his research and teaching build on his experiences at NGOs in on-the-ground practice and policy work in issues of conservation, particularly biodiversity, the Satoyama Initiative and natural capital, and teaches environmental science, conservation and sustainable development. He also serves as an honorary advisor to Conservation International Japan, vice chair of the Japan Committee for IUCN, vice chair of Regional Committee for South and East Asia of IUCN, and a member of the Environment Council of Akita Prefecture.

Kikuko Shoyama, Ph.D. (Lecture 9) Associate Professor, College of Agriculture, Department of Regional and Comprehensive Agriculture, Ibaraki University

Dr Kikuko Shoyama is an Associate Professor at the Department of Regional and Comprehensive Agriculture, College of Agriculture, Ibaraki University, Japan. Her research interests are in quantitative analysis of socio-ecological systems related to land-use change, ecosystem services, and disaster resilience, in particular, the role of scenario modeling in decision making under uncertain and changing environment. She contributed to the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) as a Lead Author for the Methodological Assessment on Scenarios and Models of Biodiversity and Ecosystem Services.

Shizuka Hashimoto, Ph.D. (Lecture 10)

Professor, The University of Tokyo

Dr. Shizuka Hashimoto is a professor at the Department of Ecosystem Studies, School of Agricultural and Life Sciences, the University of Tokyo. His research interests include land change & ecosystem service simulation, and scenario analysis. He contributed to a Japan Satoyama Satoumi Assessment as a Coordinating Lead Author and served as one of the expert group members for Japan Biodiversity Outlook 2 and 3. Internationally, he contributed to the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) Global Assessment and the Asia-Pacific Regional Assessment as a Lead Author. Since 2018, he has served as one of the Multidisciplinary Expert Panel members of IPBES.

Gowhar Meraj, Ph.D. (Lecture 11)

JSPS Post-Doctoral Fellow, The University of Tokyo

Dr. Gowhar Meraj is a JSPS Post-Doc Fellow at the Landscape Ecology and Planning Laboratory, Department of Ecosystem Studies, The University of Tokyo, Japan. His research interests include hydrology, river basin management, disaster risk assessment, and spatial analysis. Previously he was Young Scientist Fellow, Under the Department of Science and Technology, Government of India (DST-GOI), prestigious research programme of Scheme for Young Scientists and Technologists (SYST). He has also served as a Programme Officer in the flagship environmental coordination and awareness scheme of Government of India, Environmental Information Systems (ENVIS) for 5 years. He has collaborated with international researchers from Japan, Bangladesh, Vietnam, Italy, Turkey, Mongolia, and India. His dedication and expertise contribute significantly to global efforts addressing the critical challenges and opportunities in water security and environmental sustainability.
