Open to students of all fields!

**In order to solve global issues, we must confront
and solve a wide variety of problems across all fields!**

Aims and Contents of the PhD Student Support Project

The project (SPRING GX) aims to produce globally competent researchers who will contribute to realizing a Green Transformation (GX) in all fields on a large scale. The University of Tokyo will invest all existing assets to (1) create an environment where students with deep expertise and high-level research ability can freely conduct challenging and emergent research to feed their curiosity, (2) foster an "awakened culture" where GX encompasses of the future vision of society and each student's own research is related to societal issues, and (3) develop transferable skills to fully demonstrate professional abilities in society. For this purpose, three core programs and advanced skill training programs will be developed to realize a high portability of the student support environment.
