

Sustainable Bioproduction and Ecosystems Management (SBEM) - 2018

As of 19 June 2018

Dr. Osamu SAITO

Objective:

This course is to overview global consequences of ecosystem changes and drivers of these changes including international trade on global ecosystem services. The course also introduces sustainable approaches to land and ecosystem management at different levels. The students will be familiarized with the key concepts and practical methods of ecosystem assessment and landscape ecology including the techniques of accounting various ecosystem services, and be able to choose appropriate analysis tools and management options for sustainable society living in harmony with nature.

Learning Outcomes:

- Understand the key concepts and practical methods of landscape ecology and ecosystem assessment including accounting tools and market-based policy instruments to address negative and positive externalities,
- Learn sustainable ecosystems management approaches to integrate bioproduction, biodiversity, and associated ecosystem services at different scales
- Learn how to develop case studies on sustainable bioproduction and ecosystems management through group work, and collectively develop an integrated final course report

Course Outline and Schedule:

Course Unit	Date	Topic/Activity	Instructor
1	2 Oct(Tue), 16:00-17:30	Introduction and overview of the course Conceptual Framework of Biodiversity and Ecosystem Services, and current research activities at UNU-IAS	Dr. Osamu Saito
2	9 Oct (Tue), 16:00-17:30	Ecosystem Assessments (I): Inventory accounting, material flow analysis, evaluation methods and case studies	Dr. Osamu Saito
3	16 Oct (Tue), 16:00-17:30	Ecosystem Assessments (II): Mapping natural capital and ecosystem services, methods and case studies	Dr. Osamu Saito
4	23 Oct. (Tue), 16:00-17:30	Almuni session: Case studies of ecosystem services assessment in Ghana	Dr. Yaw A. Boafo
5	30 Oct (Tue), 16:00-17:30	Vegetation, GHG inventory system and biomass measurement	Dr. Osamu Saito
6	3 Nov (Sat), 13:00-16:30	Field Trip 1: Institute for Nature Study in Meguro, Tokyo	Dr. Osamu Saito
7	6 Nov (Tue), 16:00-17:30	Ecosystem Assessments (III): Global trade of natural resources; tradeoff analysis and multi-criteria analysis	Dr. Osamu Saito
8, 9	13 Nov (Tue), 14:00-17:30	Tools and models of ecosystem service assessments	Dr. Kikuko Shoyama
10	20 Nov (Tue), 14:00-15:30	Monitoring the bio-economy	Dr. Chun Sheng Goh
11	27 Nov (Tue), 14:00-15:30	Bio-energy production and ecosystem services	Dr. Alexandros Gasparatos
12, 13	TBD Dec, 12:00-16:00	Field Trip 2: Visit to Miyoshi, Saitama	Dr. Osamu Saito
14, 15	18 Dec (Tue), 13:00-15:30	Wrap-up Session Final Assessment Session	Saito Student Presentation
Extra	29 Jan. (Tue), 14:00-15:30	Feedback session	All students

Assessment:

- Class Participation: 30%

- Final Group Presentation: 30%
- Final Individual Report: 40%

Readings:

1: Introduction and overview of the course

- Dı'az et al. (2015) The IPBES Conceptual Framework — connecting nature and people, *Current Opinion in Environmental Sustainability*, 14:1–16.
- Anantha Kumar Duraiappah, Stanley Tanyi Asah, Eduardo S Brondizio, Nicolas Kosoy, Patrick J O'Farrell, Anne-Helene Prieur-Richard, Suneetha M Subramanian and Kazuhiko Takeuchi (2014) Managing the mismatches to provide ecosystem services for human well-being: a conceptual framework for understanding the New Commons, *Current Opinion in Environmental Sustainability*, 7:94–100
- Saito, O. and Ichikawa, K. (2014) Socio-ecological systems in paddy-dominated landscapes in Asian Monsoon. In Miyashita, N., Nishikawa, U. et al. (ed.) *Social-Ecological Restoration*, Springer.
- Eduardo S. Brondizio, Nathan D. Vogt, Addressa V. Mansur, Edward J. Anthony, Sandra Costa, Scott Hetrick (2016) A conceptual framework for analyzing deltas as coupled social–ecological systems: an example from the Amazon River Delta, *Sustainability Science* ,11: 591. doi:10.1007/s11625-016-0368-2

2:Ecosystem Assessments (I): Inventory accounting, material flow analysis, evaluation methods and case studies

- INTERNATIONAL STANDARD ISO 14040 (Second edition, 2006-07-01): Environmental management — Life cycle assessment — Principles and framework
- INTERNATIONAL STANDARD ISO 14044 (First edition, 2006-07-01): Environmental management — Life cycle assessment — Requirements and guidelines
- Saito, O. (2013) Resource Use and Waste Generation by the Tourism Industry in the Big Island of Hawaii, *Journal of Industrial Ecology*, 17(4): 578–589.
- Jasaw, G.S., Saito, O., and Takeuchi, K. (2015) Shea (*Vitellaria paradoxa*) Butter Production and Resource Use by Urban and Rural Processors in Northern Ghana, *Sustainability*, 7: 3592-3614. Doi:10.3390/su7043592.

3: Ecosystem Assessments (II): Mapping natural capital and ecosystem services, methods and case studies

- Peter Kareiva, Heather Tallis, Taylor H. Ricketts, Gretchen C. Daily, Stephen Polasky (2011) *Natural Capital: Theory & Practice of Mapping Ecosystem Services*, Oxford Univ Pr. 365pp.

Field Trip 1: Institute for Nature Study (自然教育園) in Meguro, Tokyo

The Institute for Nature Study, Shizen kyoiku en in Japanese, is a branch of the National Science Museum, Tokyo. It occupies a 200,000 square meter area with various original habitats of the Tokyo area, such as forest, marsh and ponds. Because the Institute’s garden has been an isolated natural habitat in the urban area and has remained well conserved for many years, it is a valuable place where rich biota are maintained. At the Institute, the museum staff conduct original research on ecology and education.

Access:

7 minutes' walk from the east exit of Meguro Station on the JR Yamanote Line.

4 minutes' walk from exit 1 of Shirokanedai Station on the Tokyo Metro Namboku Line

Address:

5-21-5 Shirokanedai, Minato-ku, Tokyo 108-0071

Tel: 03-3441-7176 Fax: 03-3441-7012 Email: ins@kahaku.go.jp

Meeting Place:

JR Meguro Station(目黒駅)

Central Exit(中央改札口) ※Attention: There are two exits at the station. Come to the central exit!!

Belongings:

writing materials, drinks, camera, handout

Contact:
